- ### 10 THINGS TO KNOW ABOUT DIGITAL FOOTPRINTS
- 1 What you post online is permanent. It has a life of its own & it's hard to delete.
 - 2 Screens of our digital footprint can be searched or shared.
 - 3 Digital footprints can be tracked & recorded both now and in the future.
 - 4 Check online. Things you see online aren't always what they seem.
 - 5 Always think before you post anything online.
 - 6 Personal information is captured with a camera with a hidden microphone.
 - 7 Anything you post can be a searchable memory.
 - 8 This is because everything you do is available & shared.
 - 9 Don't pretend you're not online. It's not worth the risk of getting caught in a bad situation.
 - 10 Don't be afraid to report anything.
